Profile

Software Engineer with 2.5 years of experience, specializing in building dynamic and responsive web applications using React for the frontend and Node.js for scalable backend services. Proficient in React, JavaScript, and modern frontend ecosystems, with expertise in developing secure RESTful APIs and microservices using Node.js. Skilled in state management, API integration, database optimization, and cloud-based deployments, with a strong focus on delivering high-performance, user-centric solutions in Agile environments.

Education

Pimpri Chinchwad College of Engineering , B.E. in Information Technology.	Jul 2020 - May 2023
• CGPA: 9.59/10	

MET Bhujbal Knowledge City Diploma in Information Technology.	Jul 2017 - May 2020
• 94.81/100	

Experience

Software Engineer, Yadgreen India , Pune	Jul 2023 – Present
• Designed and developed a complete web application for <i>Saudi Aramco</i> , one of the world's largest energy companies, using the MERN stack (MongoDB, Express.js, React, Node.js, AWS).	
• Integrated MIP Mobile SDK to enable live video streaming and playback functionalities directly in the browser. Implemented Bing Maps API to provide real-time geolocation and map overlays for monitoring site activities.	
• Contributed to building robust authentication systems, role-based dashboards, and real-time data visualization tools.	
• Built a mobile application for <i>Maaden (Saudi Arabian Mining Company)</i> using Flutter, targeting both Android and iOS platforms. Integrated features like user authentication, data dashboards, push notifications.	
• Designed and implemented the MVP version of the company's internal software, used to manage multiple operational modules: Task management, role-based access, project tracking, reporting, and a fully functional Accounts module for tracking internal financial workflows and billing processes.	
• Earned the opportunity for a 3-month onsite assignment in Bahrain owing to consistent high-quality delivery and client satisfaction.	
Associate Software Engineer Intern , Mindbody, Pune	Jan 2023 – Jun 2023
• Developed and maintained the Mindbody Developer Portal using React, enabling third-party developers to easily explore and integrate with Mindbody's APIs.	
• Built and transitioned legacy APIs into modern RESTful services, improving usability and increasing developer adoption.	
• Aligned with backend teams, designers, and product managers to streamline integration and uphold consistent API documentation.	
• Participated in code reviews, performance tuning, and deployment processes to maintain high-quality, scalable services.	
• Optimized API response time and improved user experience through streamlined data handling and endpoint restructuring.	

Skills

Programming Languages: Java, JavaScript, TypeScript, PHP

Backend Frameworks & Runtimes: Node.js, Express.js

Frontend: HTML, CSS, Tailwind CSS, ReactJS, Redux

Technologies: RESTful & SOAP APIs, Microservices

Databases: PostgreSQL, MongoDB, MySQL

Tools & Platforms: Git, GitHub, GitLab, GitHub Actions, Docker, Swagger, Postman

Cloud Technologies: AWS (EC2, S3, RDS, etc.)

Testing Frameworks: Jest
